### PEER LEARNING GROUPS AND THE ADULT LEARNER |

The Peer- Learning Model | Area of Reference:  
Motivation

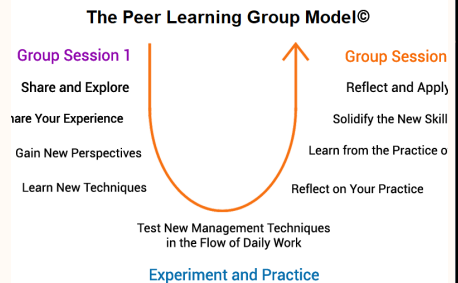

#### Short Description

The Peer Learning Group Model is based on four foundational principles: psychological safety, equality, mutual support, and growth mindset. Each member of a peer learning group:

1. feels comfortable acknowledging mistakes, asking for feedback, and maintaining an open mind to opinions different from their own
2. has an equal opportunity to participate and communicate their ideas, regardless of their position or status
3. feels supported and open to working with the other members, sharing their knowledge, skills, and ideas
4. feels that their skills can be improved with learning and practice

#### The Model
