Problem Solving in LifeLong Learning

THE LAVA PIT

Manual for peer-review in validation of non-formal and informal learning | Area of Reference: Conflict resolution

Short Description

How to play:

The game requires understanding 'How' to traverse an imaginary lava flow. The game requires understanding 'How' to traverse an imaginary lava flow. Players have three rocks that they can use to traverse the lava flow. But first, they need to follow some rules and regulations. Players cannot step on the floor. They can be on furniture or else, but on the floor. Players cannot stand still. They have to move from one piece of furniture to another. You can even set obstacles to make games more difficult. The game will improve problem solving skills. They will learn to work together to find a solution to the problem.
